CAUTION!

Do not put off until tomorrow that order which should be placed today. Too often, customers are badly disappointed by waiting until certain varieties are sold out—thus receiving only a partially filled order.

To insure good service on Rooted Cuttings, it is very necessary to place your order in advance. This, again, often saves the disappointment of a half-filled order.

Chrysanthemum orders should be booked at once upon receipt of this price list. Do not wait until the rush of late spring comes on. Make your reservations now.

Chrysanthemums

The varieties listed below are arranged in sequence as to blooming time. We grow only standard or commercial varieties which appeal to both the large and small grower. Dates given are based on plantings made in May, June and July. Naturally, the heat of summer in different localities will alter the time of date of bud. Approximations only can be given.

The Mistletoes can be held through into January by securing late cuttings. This is decidedly profitable when the shortage of flowers after Xmas is considered.
